General Provisions

GIZ procures *Digital Monitoring Tool of the S2TJ project* as Software-as-a-Service.

Contractually, this procurement and the subsequent service delivery will be based on two EVB-IT contracts:

- **EVB-IT Services**
- **EVB-IT Cloud**

The EVB-IT Cloud Contract and the associated GTC shall apply to the provision of special features of the Software-as-a-Service solutions and the associated support services (Work package 1, Work package 4).

The EVB-IT Contract for Services including the associated EVB-IT Service GTC shall apply to the other service contract components (Work package 3).

Since both contracts relate to the same procurement, they have the same contract number.
